Bivalent doses administered in NJ by age cohorts

Note: Children ages 6 mo. - 5 years who have received their primary series doses are now eligible to receive the bivalent vaccine. This section will be updated as soon as immunization data becomes available for this age group.

Primary vaccine courses (NJ & non-NJ residents vaccinated in NJ) by age category, % of total population

1. Eligible population represents value two weekdays prior (e.g., if Monday, represents the previous Thursday). The data may increase as more sites report 2. Value over 100% due to numerator including NJ and non-NJ residents while eligible population includes NJ residents only 3. Current primary series vaccinations are mostly administered to these age cohorts while other age cohorts' primary series % coverage have passed 70%. 4. There are currently less than 100 bivalent administrations for age groups 5-11.  
 Note: Includes all individuals who were vaccinated within New Jersey (those who live work or study within New Jersey). Excludes vaccines administered through select federal programs (e.g., Bureau of Prisons, Veterans Health, Indian Health Service, and Department of Defense) as well as NJ residents vaccinated in other states
