

# READY, SET, TRACTOR

Farms are busy, dynamic places filled with animals, crops, and machinery that help produce nutrients we rely on each day. That machinery often needs to utilize the roadways to reach additional agricultural fields. It is important to keep farmers and the public safe. Here are some tips for road safety:

- Slow down when approaching farm equipment.
- Expect wide turns, and give extra space.
- Avoid passing unless it is legal, safe, and clearly indicated.
- Be patient! Equipment is often on the road for only a short distance.
